Putting Cancer in its Place

Cancer prevention is central to a successful cancer control strategy. Improved knowledge about cancer risks, and effective translation of this knowledge into action, are essential for developing prevention activities. Place—where we live, work and play—significantly influences the accumulation of cancer risks that are modifiable through policy, regulatory, and behaviour changes. In this presentation I will provide an overview of my cancer prevention research program, highlighting specific studies evaluating the interaction between people, places, and cancer. Attendees of this talk will gain an understanding of how the environment influences cancer risk, and how insight into the relationship between health and place can advance cancer prevention.

Presenter **Trevor Dummer**

Associate Professor SPPH, Canadian Cancer Society Chair in Cancer Primary Prevention

C2E2 Spotlight is held monthly on the second Mondays of the month from 12:00 pm to 1:00 pm in the VGH Research Pavilion, Room 700, 7th Floor, 828 West 10th Avenue, Vancouver, BC.

Visit www.C2E2.ca for information about previous and upcoming presenters or contact pamela.lee@ubc.ca.
