

The logo features the text 'C2E2SPOTLIGHT' in a bold, white, sans-serif font against a dark blue background. To the right of the text is a stylized graphic of a human head profile in white and light blue, with a glowing lightbulb inside. The lightbulb's filament is a blue brain with several white plus signs (+) scattered across it. The background of the entire header is dark blue with diagonal light blue and white stripes on the right side.

Novel Opioid Use Disorder Interventions in the Fentanyl Era: From Bench to Bedside to Community

This presentation will examine cutting-edge clinical opioid withdrawal management and opioid agonist treatment protocols developed to treat patients using unregulated fentanyl and its analogues. It will also explore non-opioid adjunct medications and molecular targets to reduce opioid tolerance, as well as the use of medical devices and digital health apps to facilitate the treatment of opioid use disorder. Finally, the presentation will discuss an innovative primary prevention program to engage youth aimed at preventing the development of substance use disorders.

Presenter

Pouya Azar, MD, FRCPC, DABAM

Medical Manager of the Complex Pain and Addiction Service & Director of the Innovations in Mental Health, Addiction, Pain Research Program

C2E2 Spotlight is held monthly on Mondays from 12:00 pm to 1:00 pm. To attend in-person or virtually please contact pamela.lee@ubc.ca.
