The Climate Crisis and Radiology: Opportunities for Engagement

Objectives:

- 1) Describe the relationship between climate change, health care and radiology
- 2) Discuss local and national low carbon, low waste strategies in radiology

Climate change is the single biggest health threat facing humanity. Providing healthcare in Canada accounts for 4.6% of total national greenhouse gas (GHG) emissions. Radiology accounts for 1% of total global GHG emissions. The presentation will focus on opportunities in Radiology to reduce waste, reduce power use, and engage team members in low carbon, sustainable medical imaging.

Presenter

Maura Brown MD, MHA, FRCPC

Clinical Associate Professor, UBC Radiology

Co-Chair BC Cancer Planetary Health Unit

Head, Diagnostic Imaging, BC Cancer - Vancouver

C2E2 Spotlight is held monthly on Mondays from 12:00 pm to 1:00 pm. To attend in-person or virtually please contact pamela.lee@ubc.ca.
