Setting Priorities for the B.C. Health System

Setting Priorities

- Includes goals, priorities, strategies and key action areas
- Triple Aim (Institute for Healthcare Improvement)
 - ▶ Supporting the health and well-being of B.C. citizens
 - ▶ Delivering a system of responsive and effective health care services for patients across British Columbia
 - ▶ Ensuring value for money

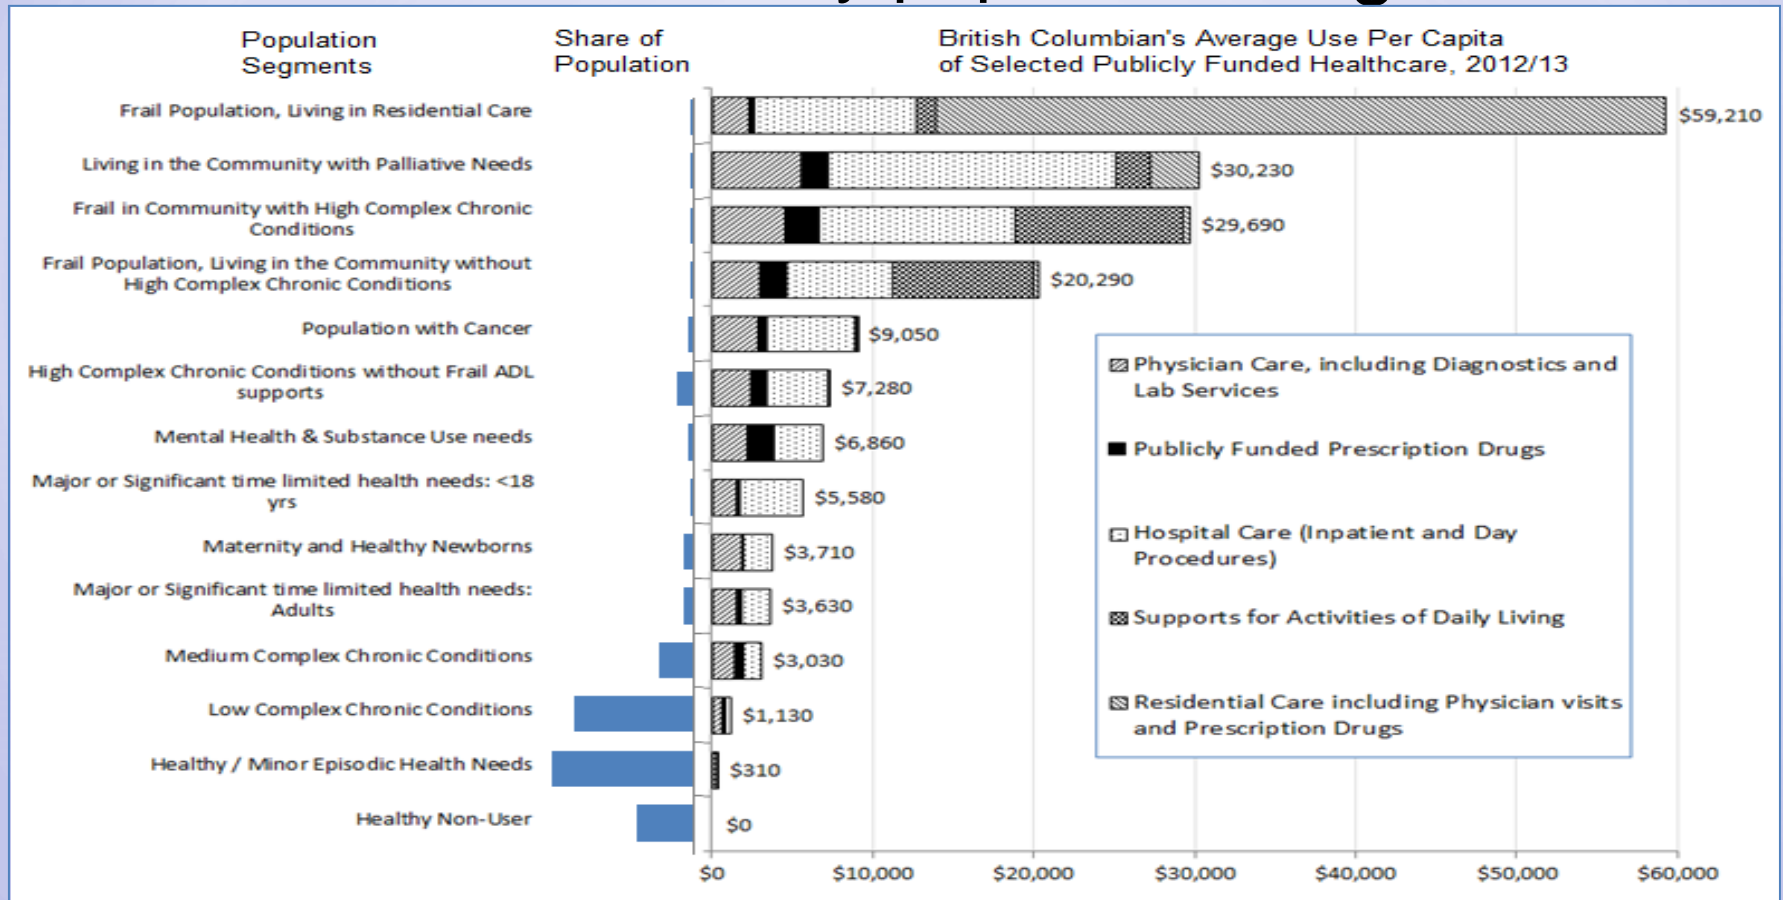

Developing the Strategy

Three important sources:

1. Lessons learned from B.C.'s efforts over the last four years to drive system change through the Innovation and Change Agenda
2. Comprehensive analysis of population health and service utilization data
3. Consultation with key stakeholders, including: health authorities, nurses, Doctors of BC, unions, BC Patient Safety and Quality Council

Health care utilization by population segments

Implementation Plan

B.C. Health System Strategy
Implementation

A Collaborative and Focused Approach

April 2014

- Explicitly sets out plan to deliver on the strategic direction identified in Setting Priorities
- Three key areas of focus:
 - Patient-Centred Care
 - Performance Management
 - Cross System Focus Areas

Patient-Centred Care

- Shift the culture of health care from being disease centered and provider focused to being patient-centered

Performance Management

- Establish a clear performance management accountability framework built on public reporting, role clarity and accountability mechanisms
- Continuous improvement across all core functions

Cross-System Focus Areas

- Care in the community
- Access to medical treatments and procedures
- Access to surgical treatments and procedures
- Hospital care
- Residential care services
