

The Centre for Clinical Epidemiology & Evaluation (C2E2) undertakes research and training and provides evidence-based advice to advance a sustainable health system for British Columbians.

How are health and financial burdens affecting our community?

How can we improve patient health outcomes?

C2E2

We focus on research collaboration that allows the highest quality of clinical and health services research. We partner strategically to maximize our research impact for the benefit of our society.

Current Centre Programs

Clinical epidemiology

Health services and outcomes

Adverse drug events

Systematic reviews

Culture, ethnicity and health

Road Safety

Health economics

Long term care

Research Expertise

Looking beyond traditional boundaries

We apply the most up to date methodologies to ensure the highest quality research:

- Knowledge translation
- Biostatistics
- Health economics
- Health technology assessment
- Evidence synthesis
- Qualitative and mixed-methods research
- Policy analysis
- Patient-oriented outcomes
- Health services research

Excellence through Collaboration

Building strong and long-lasting research partnerships

We provide **expert consultation** and **project support** for VCH, other health authorities, governments and non-profit health care agencies in the areas of biostatistics, health economics, health technology assessment, evidence synthesis, qualitative and mixed-methods research, policy analysis and patient-oriented outcomes. We also **engage** and **work collaboratively** with clinicians and researchers in grant application development and on funded research projects.

Innovative Research with Direct Health Impacts

Leading the way to healthy living and a stronger health care system

VCHRI

We focus on discovery and translational research that directly impacts health outcomes.

Vancouver Coastal Health Research Institute (VCHRI) is one of Canada's top funded health sciences research centres, receiving \$80-100 million in research funding every year. VCHRI is the research arm of Vancouver Coastal Health Authority and the health partner of the University of British Columbia.

A Dynamic and Diverse Research Environment

Providing best care, cutting-edge treatment and innovative solutions

VCH Research Institute is a major player in BC's Health Research Industry — there are research centres, research programs and many evolving research areas generating world class research outputs leading to health and economic benefits for British Columbians.

“What sets us apart is our rich, collaborative and multidisciplinary environment. We work together to create opportunities for novel and advanced treatment and prevention options to health service delivery.”

— Dr. W. Robert McMaster
VCHRI Executive Director

Together we make a difference.
