Homecare or Long-term Care? Leveraging Quantitative and Qualitative Methods to Explore Opportunities to Age at Home

Learning Objectives:

1. To learn about the Balance of Care model (UK) and its application in Ontario. The Balance of care is an approach for determining the right balance of resources between long-term care and homecare for local aging populations
2. To learn how homecare assessment data can be used in conjunction with community engagement to create personas and packages of home care service
3. To explore what data sources and approaches can be used in British Columbia to determine the balance between long-term care and homecare for aging populations

Presenter

Kerry Kuluski

Dr. Mathias Gysler Research Chair in Patient and Family-Centred care, Institute for Better Health, Trillium Health Partners and Associate Professor, Institute of Health Policy, Management and Evaluation, University of Toronto

C2E2 Spotlight is held monthly on Mondays from 12:00 pm to 1:00 pm. To attend in-person or virtually please contact pamela.lee@ubc.ca.
