

C2E2 Educational Series

Qualitative Methods for Learning Health Systems Research: Design, Integration, and Application

The Centre for Clinical Epidemiology & Evaluation (C2E2) is offering a series of educational opportunities in Fall 2026.

LIMITED SPACE AVAILABLE

REGISTER at C2E2.ca/resources/

COURSE OVERVIEW

This half-day seminar introduces principles for the application and practice of qualitative methods in learning health systems research. Participants will gain understanding of methods for qualitative data collection and their use in generating learnings that improve practice and patient experience. The course will also discuss the role of patient partners in designing qualitative research and knowledge translation activities. This course is suitable for clinicians, allied health professionals, researchers, and trainees interested in qualitative health research.

Learning objectives

Participants will gain skills in:

1. Selecting qualitative research methods suitable to relevant LHS objectives
2. Leveraging qualitative research to enrich extant quantitative data collection
3. Applying qualitative findings in LHS practice

COURSE INSTRUCTOR

Maya Vasdani

Research Assistant, C2E2, VCHRI

Limited Space Available

WHEN

October 7, 2026

8.30am - 12.30pm

WHERE

C2E2 at Vancouver General Hospital
7th Floor, 828 West 10th Avenue
Vancouver

FEE

CAD \$150
